## Professional Summary

Aspiring Software Engineer with a strong foundation in Java, Web Development, SQL, and Python. Experienced in developing full-stack web applications, database-driven systems, and AI-powered solutions through internships and academic projects. Strong problem-solving, analytical thinking, and time management skills, with a track record of adaptability and effective team collaboration in fast-paced environments.

## Education

|                                                  |                 |
|--------------------------------------------------|-----------------|
| Hindusthan Institute of Technology, Coimbatore   | 2022 –Present   |
| B.E. Computer Science and Engineering            | CGPA: 7.0       |
| St. John's Matric Higher Secondary School, Salem | 2021 – 2022     |
| Higher Secondary Education (Class XII)           | Percentage: 52% |
| St. John's Matric Higher Secondary School, Salem | 2019 – 2020     |
| Secondary Education (Class X)                    | Percentage: 50% |

## Technical Skills

Programming Languages: Java, Python, JavaScript

Web Technologies: HTML5, CSS3, React.js, Tailwind CSS, Flask

Databases: MySQL, SQL

Tools & Technologies: Git, GitHub, Docker, OpenAI API, REST APIs, Excel

Core Concepts: OOP, DBMS, Data Structures, JDBC, Responsive Web Design, API Integration

## Experience

|                                                |             |
|------------------------------------------------|-------------|
| Java Developer Intern – Network Systems, Salem | August 2023 |
|------------------------------------------------|-------------|

- Developed Java-based applications using Core Java concepts and Object-Oriented Programming principles.
- Built console-based applications, strengthening problem-solving and debugging skills.
- Gained practical exposure to the full software development life cycle.

|                                                              |           |
|--------------------------------------------------------------|-----------|
| Web Development Intern – Pixelshift Web Solution, Coimbatore | July 2024 |
|--------------------------------------------------------------|-----------|

- Developed responsive web pages using HTML, CSS, JavaScript, and PHP for client-facing applications.
- Assisted in frontend development, UI implementation, and database connectivity.
- Improved website responsiveness and usability through backend integration.

## Data Analyst Intern

- Cleaned and analyzed structured datasets using Excel and SQL.
- Generated summarized reports and visual insights to support data-driven decisions.

## Projects

### AI Trip Planner

*React.js, Flask, OpenAI API, Tailwind CSS, Scikit-Learn, Docker, AWS*

- Developed an AI-powered travel planning platform generating personalized itineraries using the OpenAI GPT API, GoogleMaps, Skyscanner, and OpenWeatherMap APIs.
- Designed a responsive UI with React.js and Tailwind CSS; implemented ML-based recommendation logic.
- Containerized the application with Docker, deployed it on AWS, and automated CI/CD using GitHub Actions.

### Employee Management System

*Java, JDBC, MySQL*

- Developed a desktop application for efficient employee record management with full CRUD operations using JDBC and MySQL.
- Added search, filtering, and input validation; designed an optimized update module for selective field modification.

#### Achievement

---

Presented technical papers at inter-college symposiums: *Cloud Computing* (Kongu Engineering College), *AI Trip Planner* (P.A. College of Engineering and Technology), and *Neura Link* (Coimbatore Institute of Technology).

- Completed multiple technical internships spanning Java development, web development, and data analytics.
- Continuously expanding technical knowledge through hands-on project development and certifications.

#### Certifications

---

Artificial Intelligence with Python – Heuristic Search  
Core Java Programming Certification
